February 5, 2021
Press Release

Lincoln Trail District Health Department (LTDHD) will open registration for Phase 1B on Tuesday, February 9th for those living in Hardin, LaRue, Marion, Meade, Nelson, and Washington Counties. Priority will be given to adults 70 and older. Other persons from phases 1A and 1B remain eligible. However, vaccinations of K-12 school personnel have been coordinated through the state. LTDHD does not have an active role in immunizing this workforce.

Appointments will be on a first-come, first-served basis, dependent on vaccine supply. However, this is the first of five vaccination clinics that we will be available for groups in Phases 1A and 1B. Individuals who do not receive an appointment should continue to check our website for future clinics. We will work with local media partners to provide advance notice on when and how individuals can register for future vaccination clinics.

Populations in Phases 1A and 1B should visit the Lincoln Trail District Health Department website at www.ltdhd.org on Tuesday, February 9th, beginning at 9:00 am. Registration will remain open until all appointments are full. Adults without internet access can call 270-769-1601 to receive help with scheduling. Individuals cannot pre-register for appointments or be placed on a waiting list.
