February 8, 2021
Press Release

Media Contact: Terrie Burgan, RN, BSN, MPH

Lincoln Trail District Health Department (LTDHD) is excited to host five COVID-19 vaccination clinics. This will allow us to immunize over 1800 people against the COVID-19 virus! Priority will be given to adults 70 and older that are not covered by the school vaccination program. Clinics will be offered on the following dates, with registration opening three business days before each clinic:

- February 12th in Nelson County
- February 15th in Meade County
- February 23rd in Marion County
- February 24th in Hardin County
- March 3rd in Hardin County

Appointments are required and will be available online or by phone on a first-come, first-served basis. Seventy-five percent of all appointments are online – the remaining 25% will be reserved by phone for those who need assistance. Due to the high demand for the COVID-19 vaccine, additional measures have been taken to decrease the probability that our computer and phone systems are overwhelmed.

Online appointments can be made through the Lincoln Trail District Health Department website at www.ltdhd.org. We understand that some senior adults lack internet access. Therefore, we ask those who can register online to do so and allow us to reserve all phone appointments for those who require assistance. To register for an appointment by phone, dial 270-769-1601.

We will use automatic messages on our website and phone system to notify the public when all available appointment slots are filled. Vaccine shipments and amounts can be uncertain from week to week. Therefore, LTDHD has chosen against maintaining a waiting list or allowing the public to pre-register for future clinics.

We will inform the public of the need to postpone and reschedule clinics due to unsafe driving conditions thru local media and our social media accounts. If forced to reschedule due to weather, appointments will be honored on an alternate date to be announced.
