Guidance for COVID-19 Quarantine for Vaccinated Persons:
(Based on CDC Guidance, found Here)

Vaccinated persons who are exposed to a COVID-19 positive person are not required to quarantine if they meet the following criteria:

- Are fully vaccinated:
  - ≥2 weeks following receipt of the second dose in a 2-dose series,
  - ≥2 weeks following receipt of one dose of a single-dose vaccine
- Have NO symptoms since the current COVID-19 exposure
- Are not persons living in group settings (such as a correctional or detention facility or group home)
- Please refer to the following website for additional information:

Persons who do not meet all of the above criteria should follow current quarantine guidance after exposure to a COVID-19 positive person.

1. (Recommended) Quarantine for 14 days; especially if you are going to be around people who are at high-risk for the virus: the elderly, people with co-morbidities, those who are immunocompromised
2. Quarantine for 10 days if you have NO symptoms
3. Quarantine for 7 days if you have a negative COVID-19 test on or after Day 5 and have NO symptoms

Vaccinated persons who do not quarantine should continue to do the following:

- Monitor for symptoms for 14 days following exposure
- Stay at least 6 feet away from others
- Wear a mask
- Avoid crowds and poorly ventilated spaces
- Cover coughs and sneezes
- Wash hands often
- If you need support or help, call your healthcare provider, local health department, or 1-844-KYTRACE
