March 17, 2020
Press Release

Effective March 18th, LaRue County Health Center will be moving to an alternate location. Our clients can use the same phone numbers to reach us, as those will be rolled over to our alternate location at 580 Westport Road, Elizabethtown, KY. This change has become necessary as Cumberland Family increases their ability to provide COVID-19 testing.

All of our locations are offering Women Infant and Children (WIC) services by phone only. HANDS and First Steps services will also continue by phone. Those customers wishing to obtain environmental services are encouraged to utilize online options. For those services that are not available online, we encourage you to call ahead to the health inspector. Your local contact information will remain the same:

LaRue County Health Center Clinical Services: 270-358-3844
LaRue County Environmental Services: 270-358-8665

For more information about HANDS or First Steps Services contact 270-769-1601

We understand that many families are affected by the necessary changes taking place to protect communities from COVID-19. We encourage those that may not have qualified in the past for WIC services to contact your local health center.
